

THE ESSENTIAL PAIN MANAGEMENT TOOL • 2008 Edition

BEDSIDE PAIN MANAGER

Updated September 2008

2 More Pages! – More Useful than Ever

"The most practical, usable pain control tool I've ever seen. I use it all the time." — Lauri Rose, RN, BSN

Designed for the Busy Healthcare Professional

It is our philosophy that every person in pain is entitled to receive effective treatment, a viewpoint gaining acceptance in all fields of healthcare. Many institutions and licensing agencies are focusing on good pain control and designating pain as the fifth vital sign.

We know how deeply committed you are to relieving your patients' pain and symptoms, and we believe you will find *BEDSIDE PAIN MANAGER* to be an invaluable aid in that quest. This ten-page, fully referenced document places essential decision-making facts and data at the fingertips of busy doctors, nurses, pharmacists and other healthcare professionals who, often under extremely demanding conditions, are charged with the responsibility of treating people suffering acute, chronic and terminal pain.

BEDSIDE PAIN MANAGER meticulously combines a multitude of key pain and symptom control information into one handy document. User-friendly conversion charts, NSAID and adjuvant tables, med dosages and costs, and dozens of useful tips and safety precautions, are integrated into two 11" x 17" sheets, folded in half to make an eight-page leaflet the size of this sheet. This 2008 version adds an additional page with an IV/PO equianalgesic chart, naloxone guidelines and more.

Unlaminated and Laminated

BEDSIDE PAIN MANAGER is printed on high-quality, coated, recycled paper. It can also be ordered laminated for protection against tearing and water damage.

Also Available from **NHPCO Marketplace & Briggs Corporation**

Part of Each Sale Donated

Pain Management Resources donates a portion of sales to Heart of the Redwoods Community Hospice, a nonprofit volunteer hospice in northern California.

Pages 2 & IV-1 of ten sheets of highly condensed, practical information

A Note from Judi Hunt, RN, Author

*For 20 years as a hospice and home health nurse, I gathered and carried with me a growing compendium of pain control pamphlets, package inserts and various workshop notes. It was very useful but unorganized, and frequently required several math steps to be able to compare one chart to another. *BEDSIDE PAIN MANAGER* puts all this information in one place, integrates it, and eliminates the need for some of the calculations.*

Having this document in hand helped me deal with my patients' pain and symptoms more smoothly, accurately, and ultimately, more effectively. I hope you also find it useful.

Quantity	Unlaminated	Laminated
1	\$ 12.00 ea.	\$ 14.00 ea.
2-4	11.00 ea.	13.00 ea.
5-9	10.00 ea.	12.00 ea.
